DETAILED ACTION

Allowable Subject Matter

1. Claims 3-5, 9-32, 37, 39 and 40 are allowed.
2. The following is an examiner's statement of reasons for allowance:
 - 2.1 Independent claim 3: The current invention claims a Content/Service Provision Node (C/SPN) for connecting to a call control messaging network and a Content/Service Messaging Network (C/SMN), Call Servers, for relaying messages between C/SPN and Subscriber Access Control Equipment (SACE) using the same protocol as used for content/service messages, and the SACE delivers content or service directly to the bearer channel of a subscriber line. Kallas (US 6,778,653) and other cited references fail to teach these features.
 - 2.2 Independent claims 10, 18, 19 and 28: The current invention discloses a method for using a SIP or similar protocol to deliver content or service of a content/service message directly to a bearer channel of a subscriber line (connected to SSP 14 in figures 3 and 4) by a subscriber access equipment (SACE) 28. Young (US 6,765,912) fails to teach direct access to a bearer channel of a subscriber line.

Art Unit: 2614

2.3 Independent claim 37: The current invention discloses a Content/Service Provision Node (C/SPN) for processing call control messages and content/service messages. The C/SPN maintains a status of instructions and executes a sequence of the instructions to provide a content or service to a telephone subscriber. Both Kallas and Voug fail to teach this claimed limitation.

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
